Certificate for Payment

Certificates for payment are a contractual device used only for CCDC2 1994 based construction contracts where more than one invoice is expected or received for a contract.

For other contracts with multiple payments (such as consultant contracts) the invoice shall show the same data as the certificate for payment, but a certificate is neither required nor appropriate.

Where the Consultant prepares a Certificate for Payment, we do not need to prepare our own duplicate Certificate. A WSIB Certificate of Clearance is required with each supplier (contractor, consultant, supplier, installer, etc.) invoice except Architects (OAA) and Engineers (PEO) and Registered Interior Designers (ARIDO) need not submit this documentation.
